DFG BO&FC 112310 Final.pdf

Hi Dale,  
Here is the report that I have been looking at...unfortunately now I don't know what website or email I got it from.

Hi Valentina,

That draft report was never finalized and was based on the modeling work we did to come up with the spring base and pulse flows at Vernalis and which we translated up into the three tributaries. I don't recall where the numbers came from in the document you are referencing. Is it possible for you to email a copy of that document, assuming your version is electronic? There was an awful lot of "stuff" going on at that time, during which I may have been consumed with temperature modeling and since it was produced by DFG staff in Sacramento I may have never received a copy. I would be happy to take a look at it and try to answer your questions.

Thanks,

Dale

Hi Dale,

So as expected I now have more questions than before...

I see in the Nov 2010 DFG Biological Objectives and Flow Criteria document that there are also January flows included.

Is this the document you are referencing in this spreadsheet but you say "draft report to SWRCB, dated September 2009" ?  
perhaps this was a change from draft to final.

Hi Valentina,

Good talking to you. Attached is the file. Fixing it was fairly simple.

Please don't hesitate to call if you have any questions.

Thanks,

Dale
